Problem Set:	Semester Project	**Semester**:	Fall 2020
Points:	*See autograder*		
Date Set:	*See autograder*	**Due Date**:	*See autograder*
Course:	CS118 Programming Fundamentals	**Instructor**:	Waqas Ali

1 Autograder Test

Since you are reading this, you have already downloaded and extracted the zip file.

1.1 Tasks to do

1. Open the file a01.py and look between the markers. You need to save the result of adding num1 and num2 into the variable v.

2. Then, run local tests using the following command:

   python run.py local

3. If all tests succeed, submit your assignment using the following command:

   python run.py remote

4. It will ask for your email and submission password. You can get both of these from the assignment page where you downloaded the zip file from.

5. Once the submission is successful, you may visit the Autograder front-end to view your submission history.

6. If you face any issue, please send me an email informing me of the error. We're still trying to work out the issues in this new system. So, your help will be greatly appreciated.
